

### *As near as naked*

New Australian bikini brand Nækd is all about loving yourself and being confident. Owner designer Kelly Mendoza has restricted the styles to three unique sizes (beautiful, gorgeous and fabulous).

All Nækd bikinis are versatile as Mendoza only designs pieces that are reversible to a solid and a print so everyone can have the best of both worlds. She uses the highest quality fabric with the aim of making the wearer feel as close to being naked as possible.

The fashionable swim suits are designed for minimal tan lines, to be worn around the house, to sleep in, for dressing up and going out, for workouts and of course – for swimming.

### *Private greenery in an instant*

Designer Plants Instant Garden Hedges and Vertical Gardens are perfect for providing attractive privacy screens that look like real plants. The artificial boxwood hedges, outdoor artificial hedges, and instant box hedges are designed to easily attach to any wall or vertical surface.

They are ideal for places where those vines just won't grow because of aspect, shade or even proximity to the swimming pool.

They are the only company in Australia specialising in hedge coverings designed for walls and fences, and they have a wide range of plants and green walls specifically designed for both indoor and outdoor use.

### *Now home owners can swim in freshwater pools*

Home owners can now enjoy the benefits of swimming in fresh water thanks to AIS's new premium EcoLine chlorine generator. AIS defines fresh water swimming pools as having TDS levels of between 1200ppm and 2500ppm – salt chlorinated pools generally have more than 5000ppm.

AIS spent seven years adapting their multi-award winning commercial technology so EcoLine could be released to the home pool owner.

AIS CEO Elena Gosse says that the demand for fresh water swimming pools is growing worldwide as more families, particularly those with young children, look for a balance between minimising pool chemicals and knowing their pool water is safe and clean, as well as some who simply want an alternative to the traditional salt water pool.

"With EcoLine, pool water is gentler on swimmers' skin and hair, the surrounding property and pool equipment," she says. "It feels like you are swimming in fresh water, yet you can remain confident in the knowledge that you are protected from nasties like waterborne pathogens and bacteria."
