

AIS Announces Major Sponsorship of WAHC 2014

As an Australian owned, award winning specialist in the design, production and supply of commercial and residential water disinfection technology, it was a natural choice for **Australian Innovative Systems (AIS)** to sign up as the major sponsor of this year's World Aquatic Health Conference (WAHC) to be held from 17-18 July

AIS factory production line

on Queensland's Gold Coast. This year's event will be the first time that the WAHC has been held outside of the United States of America. The conference will feature world-renowned experts discussing the latest advances in water science and technology, industry regulations and risk management as well as exploring issues such as safety and aquatic injuries along with water associated illness caused by exposure to germs and chemicals. AIS CEO *Elena Gosse* said, "AIS is not just a manufacturer. We are committed to ensuring that our industry's integrity is maintained and to asking some of the hard questions, such as, why are large aquatic facilities continuing to super-dose their pools with vast quantities of chlorine? As a leader in the water disinfection industry it is important that we raise topics such as refuting the old way of disinfecting water and to use facts and science to dismiss claims made by some manufacturers that certain disinfection technologies are safe for commercial use or that residential systems can be used in commercial facilities. Events such as the WAHC help to highlight these issues and continue to inspire companies such as AIS to innovate even further." ■

Aquatech China: Solutions for Chinese Water Challenges

The seventh edition of Aquatech China will reflect the high demands for water technology solutions in a country where the growing need for water exceeds the supply. The Chinese water sector is facing enormous challenges and Aquatech China offers a platform for all water professionals to come together and find solutions for these challenges. It is no coincidence that, since the exhibition was launched in 2008, Aquatech China has grown rapidly over the past six years. In addition to increasing in terms of space, the number of exhibitors and visitors has risen by almost 50% a year, reflecting the need for high-end water technology solutions in the exciting Chinese water sector. Aquatech China will be held from 25 to 27 June in Shanghai. It is the trade exhibition for process, drinking and wastewater. The exhibition offers 75,000 square meters of water technology solutions and much more besides. Visitors from all over Asia and further afield will be able to get up to speed with the latest trends and developments during events such as the Water Treatment Engineering Conference for Environmental Protection in East China; the very first Industrial Leaders Forum China; the well-known AquaStages and a Pumps Technology

The trade exhibition is for process, drinking and wastewater

Summit. Aquatech China is co-located with FlowEx China, which focuses on everything to do with pumps, valves and pipes. The organizers of Aquatech Global Events are convinced of the importance of promoting sustainable water consumption and have made the Industrial Leaders Forum an important part of all Aquatech exhibitions. ■
